

Anti-Aquaporin TIP1-2, C-terminal antibody

Catalog: PHY2189A

Product Information

Description:	Rabbit polyclonal antibody
Background:	TIP1-2 is water channel required to facilitate the transport of water across cell membrane. It may be involved in the osmoregulation in plants under high osmotic stress such as under a high salt condition.
Synonyms:	TIP1-2, GAMMA-TIP2, SALT-STRESS INDUCIBLE TONOPLAST INTRINSIC PROTEIN, SITIP, TIP1;2, TIP2, TONOPLAST INTRINSIC PROTEIN 2
Immunogen:	KLH- conjugated synthetic peptide (15 aa from C terminal section) derived from <i>Arabidopsis thaliana</i> TIP1-2 (AT3G26520).
Form:	Lyophilized
Quantity:	150 µg
Purification:	Immunogen Affinity Purified
Reconstitution:	Reconstitution with 150 µl of sterile 1 × PBS (PH=7.4). "Note: please spin tube briefly prior to opening it to avoid any losses that might occur from lyophilized material adhering to the cap or sides of the tube".
Stability & Storage:	Use a manual defrost freezer and avoid repeated freeze-thaw cycles. 12 months from date of receipt, -20 to -70°C as supplied. 6 months, -20 to -70°C under sterile conditions after reconstitution. 1 month, 2 to 8°C under sterile conditions after reconstitution.
Shipping:	The product is shipped at 4°C. Upon receipt, store it immediately at the temperature recommended above.

Application Information

Recommended Dilution:	Western Blot (1:1000-1:2000) Note: Optimal dilutions/concentrations should be determined by the end user.
Expected / apparent MW:	26 kDa
Predicted Reactivity:	Among species analyzed, the sequence of the synthetic peptide used for immunization is 80-99% homologues with the sequence in <i>Brassica rapa</i> , <i>Brassica napus</i> . For more species homologues information, please contact tech
