

Anti-Centromeric histone 3, N-terminal antibody

Catalog: PHY6558A

Product Information

Description: Rabbit polyclonal antibody

Background: CENH3 **Synonyms:** CENH3

Immunogen: KLH-conjugated synthetic peptide (15 aa from N terminal section) derived from

Triticum aestivum CENH3 (TraesCS1A03G0761600, TraesCS1B03G0870200

and TraesCS1D03G0729200 / TraesCS1D02G306100).

Form: Lyophilized

Quantity: 150 μg

Purification: Immunogen affinity purified

Reconstitution: Reconstitution with 150 µl of sterile 1XPBS (PH=7.4).

"Note: please spin tube briefly prior to opening it to avoid any losses that might

occur from lyophilized material adhering to the cap or sides of the tube".

Stability &Use a manual defrost freezer and avoid repeated freeze-thaw cycles.

Storage: 12 months from date of receipt, -20 to -70°C as supplied.

6 months. -20 to -70°C under sterile conditions after reconstitution.

1 month, 2 to 8°C under sterile conditions after reconstitution.

Shipping: The product is shipped at 4°C. Upon receipt, store it immediately at the

temperature recommended above.

Application Information

Recommended Dilution: Western Blot (1:1000-1:2000), ChIP-Seq

Note: Optimal dilutions/concentrations should be determined by the

end user.

Expected / apparent MW: 18 kDa

Predicted Reactivity: Among species analyzed, the sequence of the synthetic peptide used

for immunization is 100% homologues with the sequence in

Aegilops tauschii (AKM28569), Triticum dicoccoides

(XP 037419560), and 80-99% homologues with the sequence in

Hordeum vulgare, Hordeum bulbosum, Secale strictum,

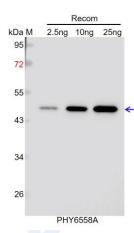

Aegilops speltoides, Secale cereale, Hordeum marinum, Oryza sativa, Panicum virgatum.

For more species homologues information, please contact tech support at tech@phytoab.com.

Application Example

Example1

Recom: 2.5 ng, 10 ng and 25 ng recombinant protein containing the peptide for immunization and having a molecular mass of 47 kDa.

Electrophoresis: 12% SDS-PAGE

Transfer: blotting to NC (nitrocellulose) membrane for 1 h.

Blocking: 5% skim milk at RT or 4°C for 1 h.

Primary antibody: 1:1000 dilution overnight at 4°C.

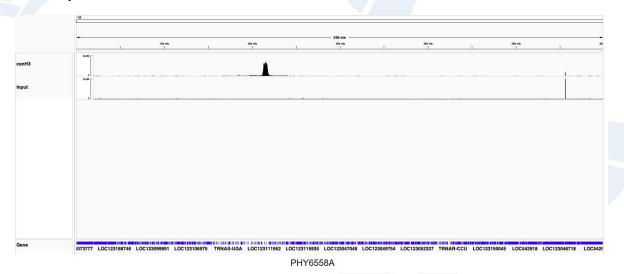

Secondary antibody: 1:10000 dilution using Goat Anti-Rabbit IgG H&L (HRP)

(Cat# PHY6000).

Detection: using chemiluminescence substrate and image were captured with

CCD camera.

Example2

Anti-CENH3 Antibody tested by Chip-seq. Chromatin was prepared from *Triticum aestivum*. 1.5 g of the wheat seedlings were fixed in 1% formaldehyde for 20 minutes, followed by the addition of 100 mmol/L glycine to terminate the fixation reaction. The supernatant was incubated with 7 μ l of a CENH3 antibody. Immunocomplexes were captured for two hours at 4 °C.
