

Anti-CreH2A, C-terminal antibody

Catalog: PHY5716A

Product Information

Description:	Rabbit polyclonal antibody
Background:	Histone H2A is a core component of nucleosomes, packaging DNA into chromatin. It stabilizes DNA wrapping around the histone octamer and regulates gene expression.
Synonyms:	H2A
Immunogen:	KLH-conjugated synthetic peptide (14 aa from C terminal section) derived from <i>Chlamydomonas reinhardtii</i> H2A (Cre13.g590800, Cre13.g591150, Cre06.g264950, Cre06.g264750, Cre06.g265350, Cre06.g268050).
Form:	Lyophilized
Quantity:	150 µg
Purification:	Immunogen affinity purified
Reconstitution:	Reconstitution with 150 µl of sterile 1XPBS (PH=7.4) containing 30% glycerol. "Note: please spin tube briefly prior to opening it to avoid any losses that might occur from lyophilized material adhering to the cap or sides of the tube".
Stability & Storage:	Use a manual defrost freezer and avoid repeated freeze-thaw cycles. 12 months from date of receipt, -20 to -70°C as supplied. 6 months, -20 to -70°C under sterile conditions after reconstitution. 1 month, 2 to 8°C under sterile conditions after reconstitution.
Shipping:	The product is shipped at 4°C. Upon receipt, store it immediately at the temperature recommended above.

Application Information

Recommended Dilution:	Western Blot (1:1000-1:2000) Note: Optimal dilutions/concentrations should be determined by the end user.
Expected / apparent MW:	14 kDa
Predicted Reactivity:	The sequence of the synthetic peptide used for immunization is 93% (13/14) homologues with the sequence in H2A (Cre06.g266700). For more species homologues information, please contact tech

Application Example

Recom: 2.5 ng, 10 ng and 25 ng recombinant protein containing the peptide for immunization and having a molecular mass of 52 kDa.

Electrophoresis: 12% SDS-PAGE

Transfer: blotting to NC (nitrocellulose) membrane for 1 h.

Blocking: 5% skim milk at RT or 4°C for 1 h.

Primary antibody: 1:1000 dilution overnight at 4°C.

Secondary antibody: 1:10000 dilution using Goat Anti-Rabbit IgG H&L (HRP) (Cat# PHY6000).

Detection: using chemiluminescence substrate and image were captured with CCD camera.
