

Anti-AtpD antibody

Catalog: PHY0207A

Product Information

Description:	Rabbit polyclonal antibody
Background:	AtpD is the chloroplast F-type ATP synthase delta subunit. It is essential for the rotational mechanism of proton-driven ATP synthesis during photosynthesis.
Synonyms:	AtpD, F-type H ⁺ -transporting ATPase subunit delta, ATP synthase F(1) sector subunit delta, F-type ATPase subunit delta
Immunogen:	KLH-conjugated synthetic peptide (15 aa from central section) derived from <i>Arabidopsis thaliana</i> AtpD (AT4G09650).
Form:	Lyophilized
Quantity:	150 µg
Purification:	Immunogen affinity purified
Reconstitution:	Reconstitution with 150 µl of sterile 1XPBS (PH=7.4) containing 30% glycerol. "Note: please spin tube briefly prior to opening it to avoid any losses that might occur from lyophilized material adhering to the cap or sides of the tube".
Stability & Storage:	Use a manual defrost freezer and avoid repeated freeze-thaw cycles. 12 months from date of receipt, -20 to -70°C as supplied. 6 months, -20 to -70°C under sterile conditions after reconstitution. 1 month, 2 to 8°C under sterile conditions after reconstitution.
Shipping:	The product is shipped at 4°C. Upon receipt, store it immediately at the temperature recommended above.

Application Information

Recommended Dilution:	Western Blot (1:1000-1:2000) Note: Optimal dilutions/concentrations should be determined by the end user.
Expected / apparent MW:	26/20 kDa
Predicted Reactivity:	Among species analyzed, the sequence of the synthetic peptide used for immunization is 87-93% homologues with the sequence in <i>Brassica napus</i> , <i>Brassica rapa</i> , <i>Populus trichocarpa</i> . For more species homologues information, please contact tech

Application Example

Recom: 2.5 ng, 10 ng and 25 ng recombinant protein containing the peptide for immunization and having a molecular mass of 40 kDa.

Electrophoresis: 12% SDS-PAGE

Transfer: blotting to NC (nitrocellulose) membrane for 1 h.

Blocking: 5% skim milk at RT or 4°C for 1 h.

Primary antibody: 1:1000 dilution overnight at 4°C.

Secondary antibody: 1:10000 dilution using Goat Anti-Rabbit IgG H&L (HRP) (Cat# PHY6000).

Detection: using chemiluminescence substrate and image were captured with CCD camera.
