

Anti-PIP1;1/PIP1;2 antibody

Catalog: PHY0051A

Product Information

Description:	Rabbit polyclonal antibody
Background:	PIP1 are plasma membrane aquaporins. They facilitate the transport of water and small neutral molecules across cellular membranes, playing crucial roles in water homeostasis, hydraulic conductivity, and plant responses to various environmental conditions.
Synonyms:	PIP1, PLASMA MEMBRANE INTRINSIC PROTEIN 1
Immunogen:	KLH-conjugated synthetic peptide (15 aa from N terminal section) derived from <i>Arabidopsis thaliana</i> PIP1;1 (AT3G61430), PIP1;2 (AT2G45960).
Form:	Lyophilized
Quantity:	150 µg
Purification:	Immunogen affinity purified
Reconstitution:	Reconstitution with 150 µl of sterile 1XPBS (PH=7.4) containing 30% glycerol. "Note: please spin tube briefly prior to opening it to avoid any losses that might occur from lyophilized material adhering to the cap or sides of the tube".
Stability & Storage:	Use a manual defrost freezer and avoid repeated freeze-thaw cycles. 12 months from date of receipt, -20 to -70°C as supplied. 6 months, -20 to -70°C under sterile conditions after reconstitution. 1 month, 2 to 8°C under sterile conditions after reconstitution.
Shipping:	The product is shipped at 4°C. Upon receipt, store it immediately at the temperature recommended above.

Application Information

Recommended Dilution:	Western Blot (1:1000-1:2000) Note: Optimal dilutions/concentrations should be determined by the end user.
Expected / apparent MW:	31 kDa
Predicted Reactivity:	Among species analyzed, the sequence of the synthetic peptide used for immunization is 100% homologues with the sequence in <i>Brassica rapa</i> , <i>Brassica napus</i> , and 80-99% homologues with the sequence in

Research Use Only

Cucumis sativus, *Gossypium raimondii*, *Vitis vinifera*, *Glycine max*,
Populus trichocarpa.

The sequence of the synthetic peptide used for immunization is 94% homologues with the sequence in PIP1;4 (AT4G00430), and 80% homologues with the sequence in PIP1;3 (AT1G01620).
