

Anti-Potassium channel AKT1 antibody

Catalog: PHY0195S

Product Information

Description: Rabbit polyclonal antibody

Background: In Arabidopsis, the Shaker family comprises nine members, which can be

segregated into five phylogenetic groups. Group I (KAT1 (AT5G46240) and KAT2 (AT4G18290)), group II (AKT1 (AT2G26650) and AKT5 (AT4G32500))

and group III (AKT2 (AT4G22200)) can produce homotetrameric

hyperpolarization-activated K⁺channels when expressed alone in heterologous expression systems. In the same conditions, group V (GORK (AT5G37500),

and SKOR (AT3G02850)) can produce homotetrameric

depolarization-activated K^+ channels. AtKC1, the single member of group IV in Arabidopsis, contributes to the inward K^+ conductance, probably in association

with AKT1 within hetero-meric channels.

Synonyms: AKT1, ATAKT1, K+ TRANSPORTER 1, KT1

Immunogen: KLH-conjugated synthetic peptide of AKT1 derived from *Arabidopsis thaliana*

AT2G26650.

Form: Lyophilized

Quantity:150 μgPurification:Serum

Peptide affinity form antibody available upon request at info@phytoab.com.

Reconstitution: Reconstitution with 150 µl of sterile water.

"Note: please spin tube briefly prior to opening it to avoid any losses that might

occur from lyophilized material adhering to the cap or sides of the tube".

Stability &Use a manual defrost freezer and avoid repeated freeze-thaw cycles.

Storage: 12 months from date of receipt, -20 to -70℃ as supplied.

6 months, -20 to -70 $^{\circ}\mathrm{C}$ under sterile conditions after reconstitution.

1 month, 2 to 8° C under sterile conditions after reconstitution.

Shipping: The product is shipped at 4°C. Upon receipt, store it immediately at the

temperature recommended above.

Application Information

Recommended Dilution: Western Blot (1:1000-1:2000)

Note: Optimal dilutions/concentrations should be determined by the

end user.

Expected/apparent MW: 116 kDa

Confirmed Reactivity: Coming soon

Predicted Reactivity: Among 25 analyzed species, the sequence of the synthetic peptide

used for immunization is 80-99% homologues with the sequence in

Zea mays.

For more species homologues information, please contact tech

support at tech@phytoab.com.
