

Anti-Enolase antibody

Catalog: PHY0213

Product Information

Description: Rabbit polyclonal antibody

Background: Enolases are key glycolytic enzymes that are highly conserved in prokaryotic

and eukaryotic organisms and are among the most abundant cytosolic proteins.

Synonyms: Enolase, ENO2, ENOLASE 2, LOS2, LOW EXPRESSION OF OSMOTICALLY

RESPONSIVE GENES 2

Immunogen: KLH-conjugated synthetic peptide of Enolase derived from *Arabidopsis thaliana*

AT2G36530.

Form: Lyophilized

Quantity: 150 μg

Purification: Protein A purified

Reconstitution: Reconstitution with 150µl of 0.01M sterile PBS.

"Note: please spin tube briefly prior to opening it to avoid any losses that might

occur from lyophilized material adhering to the cap or sides of the tube".

Stability & Use a manual defrost freezer and avoid repeated freeze-thaw cycles.

Storage: 12 months from date of receipt, -20 to -70°C as supplied.

6 months, -20 to -70°C under sterile conditions after reconstitution.

1 month, 2 to 8°C under sterile conditions after reconstitution.

Shipping: The product is shipped at 4°C. Upon receipt, store it immediately at the

temperature recommended above.

Application Information

Recommended Dilution: Western Blot (1:1000-1:2000)

Note: Optimal dilutions/concentrations should be determined by the

end user.

Expected/apparent MW: 48 kDa

Confirmed Reactivity: Arabidopsis thaliana

Predicted Reactivity: Among 25 analyzed species, the sequence of the synthetic peptide

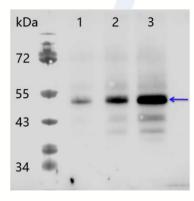

used for immunization is 100% homologues with the sequence in Brassica rapa subsp. Oleifera, Solanum lycopersicum, Brassica napus, and 80-99% homologues with the sequence in Oryza sativa

Research Use Only

Japonica Group, Zea mays, Triticum aestivum, Spinacia oleracea. For more species homologues information, please contact tech support at tech@phytoab.com.

Application Example

PHY0213

Lane 1: 10 µg total protein from Arabidopsis thaliana leaf.

Lane 2: 25 µg total protein from Arabidopsis thaliana leaf.

Lane 3: 50 µg total protein from Arabidopsis thaliana leaf.

Electrophoresis: 12.5% SDS-Urea-PAGE

Transfer: blotting to NC (nitrocellulose) membrane for 1 h.

Blocking: 5% skim milk at RT or 4° C for 1 h.

Primary antibody: 1:1000 dilution overnight at 4°C.

Secondary antibody: 1:20000 dilution using Goat Anti-Rabbit IgG H&L

(HRP) (Cat# PHY6000).

Detection: using chemiluminescence substrate and image were

captured with CCD camera.
