

Anti-YCF3, N-terminal antibody

Catalog: PHY3262A

Product Information

Description: Rabbit polyclonal antibody

Background: YCF3 is essential for the assembly of the photosystem I (PSI) complex. In

Chlamydomonas reinhardtii, it seems to act as a PSI specific chaperone

facilitating the assembly of the complex by interacting with PsaA and PsaD.

Synonyms: YCF3

Immunogen: KLH-conjugated synthetic peptide (14 aa from N terminal section) derived from

Arabidopsis thaliana YCF3 (ATCG00360).

Form: Lyophilized

Quantity: 150 μg

Purification: Immunogen affinity purified

Reconstitution: Reconstitution with 150 µl of 0.01 M sterile PBS.

"Note: please spin tube briefly prior to opening it to avoid any losses that might

occur from lyophilized material adhering to the cap or sides of the tube".

Stability &Use a manual defrost freezer and avoid repeated freeze-thaw cycles.

Storage: 12 months from date of receipt, -20 to -70° C as supplied.

6 months, -20 to -70 °C under sterile conditions after reconstitution.

1 month, 2 to 8℃ under sterile conditions after reconstitution.

Shipping: The product is shipped at 4°C. Upon receipt, store it immediately at the

temperature recommended above.

Application Information

Recommended Dilution: Western Blot (1:1000-1:2000)

Note: Optimal dilutions/concentrations should be determined by the

end user.

Expected/apparent MW: 15 kDa

Confirmed Reactivity: Coming soon

Predicted Reactivity: Among species analyzed, the sequence of the synthetic peptide used

for immunization is 100% homologues with the sequence in *Solanum lycopersicum*, *Cucumis sativus*, *Glycine max*, *Medicago truncatula*, *Nicotiana tabacum*, *Solanum tuberosum*, *Vitis vinifera*, *Gossypium*

raimondii, Populus trichocarpa, Spinacia oleracea, Brassica napus, Brassica rapa, and 80-99% homologues with the sequence in Oryza sativa, Triticum aestivum, Hordeum vulgare, Panicum virgatum, Zea mays, Physcomitrium patens.

For more species homologues information, please contact tech support at tech@phytoab.com.
