

Anti-Protein TIC 22, chloroplastic, C-terminal antibody

Catalog: PHY2140S

Product Information

Description: Rabbit polyclonal antibody

Background: In Arabidopsis, Tic22 has two homologues, atTic22-III(AT3G23710) and

atTic22-IV(AT4G33350). The two Tic22 isoforms act redundantly in chloroplast protein import, and that their function is non-essential but nonetheless required for normal chloroplast biogenesis, particularly during early plant development.

Synonyms: TIC22-IV, ATTIC22-IV, TRANSLOCON AT THE INNER ENVELOPE

MEMBRANE OF CHLOROPLASTS 22-IV

Immunogen: KLH-conjugated synthetic peptide (15 aa from C terminal section) derived from

Arabidopsis thaliana TIC22-IV (AT4G33350).

Form: Lyophilized

Quantity:150 μgPurification:Serum

Peptide affinity form antibody available upon request at info@phytoab.com.

Reconstitution: Reconstitution with 150 µl of sterile water.

"Note: please spin tube briefly prior to opening it to avoid any losses that might

occur from lyophilized material adhering to the cap or sides of the tube".

Stability &Use a manual defrost freezer and avoid repeated freeze-thaw cycles.

Storage: 12 months from date of receipt, -20 to -70°C as supplied.

6 months, -20 to -70°C under sterile conditions after reconstitution.

1 month, 2 to 8°C under sterile conditions after reconstitution.

Shipping: The product is shipped at 4°C. Upon receipt, store it immediately at the

temperature recommended above.

Application Information

Recommended Dilution: Western Blot (1:1000-1:2000)

Note: Optimal dilutions/concentrations should be determined by the

end user.

Expected / apparent MW: 30 / 16 kDa

Confirmed Reactivity: Arabidopsis thaliana

Research Use Only

Predicted Reactivity: Among species analyzed, the sequence of the synthetic peptide used

for immunization is 80-99% homologues with the sequence in

Brassica napus, Brassica rapa.

For more species homologues information, please contact tech

support at tech@phytoab.com.

Application Example

Chl: 10 µl total chloroplast protein from *Arabidopsis thaliana*.

Electrophoresis: 15% SDS-PAGE

Transfer: blotting to NC (nitrocellulose) membrane for 1 h.

Blocking: 5% skim milk at RT or 4°C for 1 h.

Primary antibody: 1:1000 dilution overnight at 4°C.

Secondary antibody: 1:10000 dilution using Goat Anti-Rabbit IgG H&L (HRP) (Cat#

PHY6000).

Detection: using chemiluminescence substrate and image were captured with CCD

camera.
