

## Anti-PLASTID TRANSCRIPTIONALLY ACTIVE 9, C-terminal antibody

Catalog: PHY0396S

## **Product Information**

**Description:** Rabbit polyclonal antibody

**Background:** In chloroplasts, transcription of plastid genes is mediated by two types of RNA

polymerase: plastid-encoded RNA polymerase (PEP) and nuclearencoded

RNA polymerase (NEP). Transcription in plastids is also mediated by a number of nuclear-encoded factors in addition to PEP and NEP. In the insoluble RNA polymerase preparation samples, a total of 18 components named as pTACs

(pTAC1 to pTAC18) were identified. pTAC9 (AT4G20010) is one of the

components associated with PEP complex.

**Synonyms:** pTAC9, ORGANELLAR SINGLE-STRANDED DNA BINDING PROTEIN 2,

OSB2, PLASTID TRANSCRIPTIONALLY ACTIVE 9, PTAC9

Immunogen: KLH-conjugated synthetic peptide (16 aa from C terminal section) derived from

Arabidopsis thaliana pTAC9 (AT4G20010).

Form: Lyophilized

Quantity:150 μgPurification:Serum

Peptide affinity form antibody available upon request at <a href="mailto:info@phytoab.com">info@phytoab.com</a>.

**Reconstitution:** Reconstitution with 150 µl of sterile water.

"Note: please spin tube briefly prior to opening it to avoid any losses that might

occur from lyophilized material adhering to the cap or sides of the tube".

Stability & Use a manual defrost freezer and avoid repeated freeze-thaw cycles.

Storage: 12 months from date of receipt, -20 to -70°C as supplied.

6 months, -20 to -70°C under sterile conditions after reconstitution.

1 month, 2 to 8°C under sterile conditions after reconstitution.

**Shipping:** The product is shipped at 4°C. Upon receipt, store it immediately at the

temperature recommended above.

## **Application Information**

Recommended Dilution: Western Blot (1:1000-1:2000)

Note: Optimal dilutions/concentrations should be determined by the

end user.

Expected / apparent MW: 42 kDa

Predicted Reactivity: Among species analyzed, the sequence of the synthetic peptide used

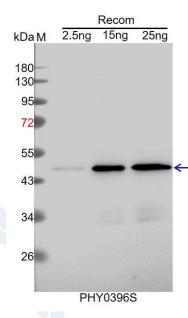

for immunization is 100% homologues with the sequence in *Brassica* rapa, *Brassica napus* and 80-99% homologues with the sequence in

Glycine max, Hordeum vulgare, Medicago truncatula.

For more species homologues information, please contact tech

support at tech@phytoab.com.

## **Application Example**

Recom: 2.5 ng, 15 ng and 25 ng recombinant protein containing the peptide for immunization and having a molecular mass of 50 kDa.

Electrophoresis: 12% SDS-PAGE

Transfer: blotting to NC (nitrocellulose) membrane for 1 h.

**Blocking:** 5% skim milk at RT or 4°C for 1 h.

**Primary antibody:** 1:1000 dilution overnight at 4°C.

Secondary antibody: 1:10000 dilution using Goat Anti-Rabbit IgG H&L

(HRP) (Cat# PHY6000).

**Detection:** using chemiluminescence substrate and image were captured

with CCD camera.
