

## Anti-Auxin efflux carrier component 1 antibody

Catalog: PHY3345A

## **Product Information**

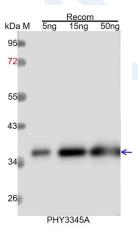

| Description:           | Rabbit polyclonal antibody   |  |
|------------------------|--|--|
| Background:            | PIN1 is an auxin efflux carrier involved in shoot and root development. In roots,                    |  |
|                        | PIN1 mainly resides at the basal end of the vascular cells.  |  |
| Synonyms:              | PIN1, AtPIN1, ARABIDOPSIS THALIANA PIN-FORMED 1, PIN-FORMED 1  |  |
| Immunogen:             | KLH-conjugated synthetic peptide (15 aa from C terminal section) derived from                        |  |
|                        | Arabidopsis thaliana PIN1 (AT1G73590).   |  |
| Form:                  | Lyophilized  |  |
| Quantity:              | 150 µg   |  |
| Purification:          | Immunogen affinity purified  |  |
| <b>Reconstitution:</b> | Reconstitution with 150 µl of 0.01 M sterile PBS.  |  |
|                        | "Note: please spin tube briefly prior to opening it to avoid any losses that might                   |  |
|                        | occur from lyophilized material adhering to the cap or sides of the tube".                           |  |
| Stability &            | Use a manual defrost freezer and avoid repeated freeze-thaw cycles.                                  |  |
| Storage:               | 12 months from date of receipt, -20 to -70 <sup>°</sup> C as supplied.                               |  |
|                        | 6 months, -20 to -70 $^\circ \!$ |  |
|                        | 1 month, 2 to 8 $^\circ\!{ m C}$ under sterile conditions after reconstitution.                      |  |
| Shipping:              | The product is shipped at 4 $^\circ\!\mathrm{C}$ . Upon receipt, store it immediately at the         |  |
|                        | temperature recommended above.   |  |

## **Application Information**

| Recommended Dilution:   | Western Blot (1:1000-1:2000)   |
|-------------------------|--|
|                         | Note: Optimal dilutions/concentrations should be determined by the               |
|                         | end user.  |
| Expected / apparent MW: | 67 kDa   |
| Predicted Reactivity:   | Among species analyzed, the sequence of the synthetic peptide used               |
|                         | for immunization is 100% homologues with the sequence in <i>Brassica</i>         |
|                         | <i>napus</i> , and 80-99% homologues with the sequence in <i>Brassica rapa</i> . |
|                         | For more species homologues information, please contact tech                     |
|                         | support at <u>tech@phytoab.com</u> .   |

## **Application Example**

Recom: 5 ng, 15 ng and 50 ng recombinant protein containing the peptide for immunization and having a molecular mass of 36 kDa.

Electrophoresis: 12% SDS-PAGE

**Transfer:** blotting to NC (nitrocellulose) membrane for 1 h.

**Blocking:** 5% skim milk at RT or  $4^{\circ}$  for 1 h.

Primary antibody: 1:1000 dilution overnight at 4 °C.

Secondary antibody: 1:10000 dilution using Goat Anti-Rabbit IgG H&L (HRP) (Cat# PHY6000).

**Detection:** using chemiluminescence substrate and image were captured with CCD camera.

**Research Use Only**
