

# Anti-Lhcb7 protein of LHCII antibody

Catalog: PHY0471S

### **Product Information**

Description:	Rabbit polyclonal antibody
Background:	The light-harvesting complex (LHC) functions as a light receptor; it captures
	and delivers excitation energy to photosystem. The nuclear LHCB7 gene is
	common in higher plants, encodes a transcript that is well expressed in a
	subset of leaf mesophyll cells, and is associated with a protein product that is
	homologous to pigment-binding components of the photosystem (PS) II
	peripheral antenna complex.
Synonyms:	Lhcb7
Immunogen:	KLH-conjugated synthetic peptide (15 aa from N terminal section) derived from
	Arabidopsis thaliana Lhcb7 (AT1G76570).
Form:	Lyophilized
Quantity:	150 μg
Purification:	Serum
	Peptide affinity form antibody available upon request at <u>info@phytoab.com</u> .
<b>Reconstitution:</b>	Reconstitution with 150 µl of sterile water.
	"Note: please spin tube briefly prior to opening it to avoid any losses that might
	occur from lyophilized material adhering to the cap or sides of the tube".
Stability &	Use a manual defrost freezer and avoid repeated freeze-thaw cycles.
Storage:	12 months from date of receipt, -20 to -70 $^\circ\!\!\!\!\!\!^\circ$ as supplied.
	6 months, -20 to -70 $^\circ\!\!\!\!\!^\circ$ under sterile conditions after reconstitution.
	1 month, 2 to 8 $^\circ\!{ m C}$ under sterile conditions after reconstitution.
Shipping:	The product is shipped at 4 $^\circ\!{ m C}$ . Upon receipt, store it immediately at the
	temperature recommended above.

## **Application Information**

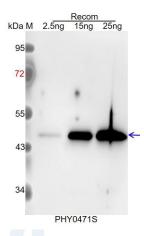

Recommended Dilution:	Western Blot (1:1000-1:2000)
	Note: Optimal dilutions/concentrations should be determined by the
	end user.
Expected / apparent MW:	36 kDa

### Predicted Reactivity:

Among species analyzed, the sequence of the synthetic peptide used for immunization is 80-99% homologues with the sequence in *Brassica rapa, Brassica napus, Cucumis sativus.* For more species homologues information, please contact tech support at <u>tech@phytoab.com</u>.

### **Application Example**

Recom: 2.5 ng, 10 ng and 25 ng recombinant protein containing the peptide for immunization and having a molecular mass of 47 kDa.

Electrophoresis: 12% SDS-PAGE

Transfer: blotting to NC (nitrocellulose) membrane for 1 h.

**Blocking:** 5% skim milk at RT or  $4^{\circ}$ C for 1 h.

**Primary antibody:** 1:1000 dilution overnight at 4°C.

Secondary antibody: 1:10000 dilution using Goat Anti-Rabbit IgG H&L (HRP) (Cat# PHY6000).

**Detection:** using chemiluminescence substrate and image were captured with CCD camera.

#### **Research Use Only**
