

## Anti-Acid beta-fructofuranosidase 4, vacuolar antibody

Catalog: PHY1454S

## **Product Information**

**Description:** Rabbit polyclonal antibody

**Background:** BFRUCT4 is a vacuolar invertase beta Fruct4 which is transported from the

endoplasmic reticulum through the intermediate compartments as a membrane

protein. Its possible role is in the continued mobilization of sucrose to sink

organs, and it also regulates root elongation.

**Synonyms:** FRUCT4, ATBETAFRUCT4, ATFRUCT4, ATVI2, FRUCTOSIDASE 4, VAC-INV,

VACUOLAR INVERTASE, VACUOLAR INVERTASE 2, VI2, BFRUCT4

**Immunogen:** KLH-conjugated synthetic peptide (20 aa from C terminal section) derived from

Arabidopsis thaliana FRUCT4 (AT1G12240).

Form: Lyophilized

**Quantity**: 150 μg **Purification**: Serum

Peptide affinity form antibody available upon request at <a href="mailto:info@phytoab.com">info@phytoab.com</a>.

**Reconstitution:** Reconstitution with 150 µl of sterile water.

"Note: please spin tube briefly prior to opening it to avoid any losses that might

occur from lyophilized material adhering to the cap or sides of the tube".

**Stability &**Use a manual defrost freezer and avoid repeated freeze-thaw cycles.

Storage: 12 months from date of receipt, -20 to -70 °C as supplied.

6 months, -20 to -70°C under sterile conditions after reconstitution.

1 month, 2 to 8℃ under sterile conditions after reconstitution.

**Shipping:** The product is shipped at 4°C. Upon receipt, store it immediately at the

temperature recommended above.

## **Application Information**

**Recommended Dilution:** Western Blot (1:1000-1:2000)

Note: Optimal dilutions/concentrations should be determined by the

end user.

Expected / apparent MW: 74 kDa

Predicted Reactivity: Among species analyzed, the sequence of the synthetic peptide used

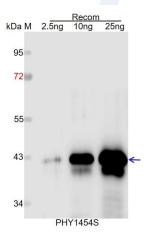

for immunization is 80-99% homologues with the sequence in

Brassica napus, Brassica rapa.

For more species homologues information, please contact tech support at <a href="mailto:tech@phytoab.com">tech@phytoab.com</a>.

## **Application Example**

Recom: 2.5 ng, 10 ng and 25 ng recombinant protein containing the peptide

for immunization and having a molecular mass of 42 kDa.

Electrophoresis: 12% SDS-PAGE

Transfer: blotting to NC (nitrocellulose) membrane for 1 h.

**Blocking:** 5% skim milk at RT or 4℃ for 1 h.

**Primary antibody:** 1:1000 dilution overnight at  $4^{\circ}$ C.

Secondary antibody: 1:10000 dilution using Goat Anti-Rabbit IgG H&L (HRP)

(Cat# PHY6000).

**Detection:** using chemiluminescence substrate and image were captured

with CCD camera.
