

Anti-Transmembrane copper transporter CTR1, C-terminal antibody

Catalog: PHY5613S

Product Information

Description: Rabbit polyclonal antibody

Background: The Ctr protein contains three assumed transmembrane regions. It is a plasma

membrane protein that transports Cu from extracellular space to cytosol or vacuoles or lysosomes, from vacuoles or lysosomes to cytoplasm. Ctr protein can form a homodimer, homologous trimer, or heterozygote with itself or one another, or form a heterozygote of another protein related to Cu transport.

Synonyms: CTR1

Immunogen: KLH-conjugated synthetic peptide (15 aa from C terminal section) derived from

Chlamydomonas reinhardtii CTR1 (Cre13.g570600).

Form: Lyophilized

Quantity:150 μgPurification:Serum

Peptide affinity form antibody available upon request at info@phytoab.com.

Reconstitution: Reconstitution with 150 µl of sterile water.

"Note: please spin tube briefly prior to opening it to avoid any losses that might

occur from lyophilized material adhering to the cap or sides of the tube".

Stability &Use a manual defrost freezer and avoid repeated freeze-thaw cycles.

Storage: 12 months from date of receipt, -20 to -70°C as supplied.

6 months, -20 to -70°C under sterile conditions after reconstitution.

1 month, 2 to 8°C under sterile conditions after reconstitution.

Shipping: The product is shipped at 4°C. Upon receipt, store it immediately at the

temperature recommended above.

Application Information

Recommended Dilution: Western Blot (1:1000-1:2000)

Note: Optimal dilutions/concentrations should be determined by the

end user.

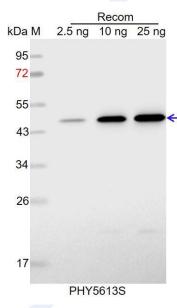

Expected/apparent MW: 63 kDa

Predicted Reactivity: For more species homologues information, please contact tech

support at tech@phytoab.com.

Application Example

Recom: 2.5 ng, 10 ng and 25 ng recombinant protein containing the peptide for immunization and having a molecular mass of 47 kDa.

Electrophoresis: 12% SDS-PAGE

Transfer: blotting to NC (nitrocellulose) membrane for 1 h.

Blocking: 5% skim milk at RT or 4° C for 1 h.

Primary antibody: 1:1000 dilution overnight at 4°C.

Secondary antibody: 1:10000 dilution using Goat Anti-Rabbit IgG H&L

(HRP) (Cat# PHY6000).

Detection: using chemiluminescence substrate and image were

captured with CCD camera.
